

To Whom it May Concern:

It is my pleasure to strongly recommend Kasey Murphree for your 3rd Grade Math Teacher position.

I am Melinda K. Gibbs, prior Office Manager for Mid-South Micro in White House, Tennessee. I have 25 years of experience working in computer training and education and have seen many great instructors come and go. Kasey is one individual I have worked with who uniquely stands out.

During Kasey's time as a trainer at Mid-South Micro, she displayed great talents in managing her classroom, teaching concepts to all learning styles and developing a genuine love of learning in her students. When we first met, I was immediately impressed with Kasey and I was lucky enough to see her grow and learn as an educator. Keep in mind, the majority of the people she trained were adults. This created a unique classroom of figuring out how everyone learned. Also, Kasey was a young adult at the time and had a great rapport with her diverse range of students.

I am confident that Kasey would be a great fit for your school. Not only will she bring the kind of skills and experiences you're looking for in an applicant, she will quickly become an asset and help both your institution and your students grow in any ways she can.

If you need more information or specific examples, please do not hesitate to contact me at [Melinda.k.gibbs@hud.gov](mailto:Melinda.k.gibbs@hud.gov) or (817) 876-9079. As a recommendation letter likely only provides a snapshot of her talents and achievements, I would be happy to further elaborate on my time working with her.

Sincerely,

Melinda K. Gibbs  
Financial Analyst, HUD
